TIME PERIODS FOR FILING A REPLY TO THIS NOTICE:

1. Applicant is given **no new time period** if the non-compliant amendment is an after-final amendment or an amendment filed after allowance. If applicant wishes to resubmit the non-compliant after-final amendment with corrections, the **entire corrected amendment** must be resubmitted.
2. Applicant is given **one month**, or thirty (30) days, whichever is longer, from the mail date of this notice to supply the correction, if the non-compliant amendment is one of the following: a preliminary amendment, a non-final amendment (including a submission for a request for continued examination (RCE) under 37 CFR 1.114), a supplemental amendment filed within a suspension period under 37 CFR 1.103(a) or (c), and an amendment filed in response to a *Quayle* action. If any of above boxes 1. to 4. are checked, the correction required is only the **corrected section** of the non-compliant amendment in compliance with 37 CFR 1.121.

Extensions of time are available under 37 CFR 1.136(a) only if the non-compliant amendment is a non-final amendment or an amendment filed in response to a *Quayle* action.

Failure to timely respond to this notice will result in:

Abandonment of the application if the non-compliant amendment is a non-final amendment or an amendment filed in response to a *Quayle* action; or

Non-entry of the amendment if the non-compliant amendment is a preliminary amendment or supplemental amendment.

Continuation of 1(c) Other:

The applicants are thanked for the Amendment to the Specification (filed 29 September 2006). However, several seemingly non-compliant amendments have been discovered in the aforementioned response, requiring attention before examination may continue.

MPEP § 714 (II) requires, "All amendments filed on or after July 30, 2003 must comply with 37 CFR 1.121 as revised in the notice of final rule making published in the Federal Register on June 30, 2003 at 65 Fed. Reg. 38611. The manner of making amendments has been revised to assist in the implementation of beginning-to-end electronic image processing of patent applications. Specifically, changes have been made to facilitate electronic image data capture and processing and streamline the patent application process. If an amendment filed on or after July 30, 2003 does not comply with revised 37 CFR 1.121, the Office will notify applicants via a Notice of Non-Compliant Amendment that the amendment is not accepted."

C.F.R. § 1.121(b)(3)(ii) further requires, "A substitute specification in compliance with § 1.125(b) and (c)."

C.F.R. § 1.125(c) states, "A substitute specification submitted under this section must be submitted with markings showing all the changes relative to the immediate prior version of the specification of record. The text of any added subject matter must be shown by underlining the added text. The text of any deleted matter must be shown by strike-through except that double brackets placed before and after the deleted characters may be used to show deletion of five or fewer consecutive characters. The text of any deleted subject matter must be shown by being placed within double brackets if strike-through cannot be easily perceived. An accompanying clean version (without markings) must also be supplied. Numbering the paragraphs of the specification of record is not considered a change that must be shown pursuant to this paragraph."

The Amendment to the Specification (filed 29 September 2006) improperly uses double brackets to indicate the deletion of subject matter which is nonexistent in the immediate prior version of the specification of record (e.g., see page 47, lines 5, 6, 8, and 9 of the marked-up substitute specification). The reference numerals "(10)," "(50)," and "(11)" do not appear in the originally filed abstract (see page 52 of the specification filed 25 August 2003).

The applicants are respectfully encouraged show all the changes relative to the immediate prior version of the specification of record (i.e., the specification as originally filed on 25 August 2003).

By such reasoning, this Notice of Non-Compliance is deemed necessary and proper at this time.

Please note: Due to the significant length and degree of the Amendment to the Specification (filed 29 September 2006), the amendments have not been checked to the extent necessary to determine the presence of all possible non-compliance errors. If additional issues of non-compliance are discovered at the time of a subsequent response, yet another Notice of Non-Compliance will be necessitated. Applicants' cooperation is respectfully requested in correcting any other errors of which applicants may become aware.
